

Reema Rifaideen

JUNIOR SOFTWARE DEVELOPER

+94 777264826 | reemarifaideen.it@gmail.com | Matale, Srilanka

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Enthusiastic Junior Software Developer with knowledge of web development and practical experience building responsive projects. A fast learner with strong problem-solving abilities, attention to detail, and a passion for improving technical skills. Seeking an entry-level developer role where I can apply my knowledge, contribute to team goals, and grow as a professional.

SKILLS

- **Technical Expertise:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, Responsive Web Design
- **Familiar With:** AI/ML, Python, C Programming, Database Management, UI/UX Design, WordPress Core
- **Tools & Platforms:** Git, GitHub, VS Code, Chrome DevTools
- **Other Skills:** Problem Solving, Software Testing, Team Collaboration, Customer focus

FREELANCE PROJECTS

SheTravel | *Travel Website*

[GitHub](#) | [Live Demo](#)

Project Overview: Designed and developed a modern, responsive travel website using HTML, CSS, and Bootstrap. Created an engaging user interface with destination sections, travel packages, and mobile-friendly layouts to enhance user experience.

Technologies Used: HTML, CSS, Bootstrap

StitchCraft | *Premium Tailor Shop Website*

[GitHub](#) | [Live Demo](#)

Project Overview: Designed and developed a responsive tailor shop website with a modern UI to showcase tailoring services, custom designs, and business information. Implemented clean layouts and user-friendly navigation using HTML, CSS, and Bootstrap.

Technologies Used: HTML5, CSS3, Bootstrap

Flora Shopy | *ECommerce Flower Shop Website*

[GitHub](#) | [Live Demo](#)

Project Overview: Designed and developed a responsive e-commerce flower shop website with a modern interface to showcase floral products, categories, and customer-friendly shopping experience. Implemented clean layouts and interactive sections using HTML, CSS, and Bootstrap.

Technologies Used: HTML5, CSS3, Bootstrap

GAMING PROJECTS

Dice | *Dice Game Website*

[GitHub](#) | [Live Demo](#)

Project Overview: Developed a responsive dice game to practice JavaScript logic, DOM manipulation, and interactive UI behavior. Implemented random number generation and dynamic result updates to create an engaging browser-based game experience.

Technologies Used: HTML5, CSS3, JavaScript

Simon | *Simon Game Website*

[GitHub](#) | [Live Demo](#)

Project Overview: Built a memory-based Simon game to improve logic-building and user interaction through sequence-based gameplay. Implemented event-driven programming and real-time input validation to enhance interactivity and game performance.

Technologies Used: HTML5, CSS3, JavaScript, jQuery
